About Glucoferrin®

Nutraceutical GTF Complex for Insulin Resistance and Glucose Metabolism

Nutraceutical GTF Complex for Insulin Resistance and Glucose Metabolism
Glucoferrin® dietary and nutritional supplement is a unique nutritional complex designed to optimize insulin potency and sustain proper insulin production levels by providing GTF-Glucose Tolerance Factor necessary for the human body.

Insulin is a vital hormone produced by the pancreas. It plays a crucial role in the metabolism of carbohydrates, sugars, starches, fats, and proteins – the chemical processes that occur within a living organism to maintain life. The liver also requires GTF to manufacture fatty acids, lecithin, and lipoproteins.

Glucoferrin® is a specially formulated supplement that provides maximum strength and absorption of GTF chromium, which is known to be difficult to absorb. By addressing GTF deficiency, Glucoferrin® helps combat conditions such as insulin resistance and metabolic syndrome.

Key Benefits

Helps Combat Multiple Conditions

- **Optimizes insulin potency**
- **Sustains proper insulin prod. levels**
- **Supports glucose metabolism**
- **Enhances energy levels**
- **Promotes overall well-being**

Directions for Use:

Take 1-2 capsules of Glucoferrin® daily with food and water to support optimal glucose metabolism, strength, and daily well-being.

Why Choose Glucoferrin®

A Unique Nutritional Complex

- Provides GTF-Glucose Tolerance Factor
- Maximum strength and absorption
- Designed for daily supplementation
- Supports insulin sensitivity and metabolic health
