

# Unlock Your Metabolic Potential with Glucoferrin®

## GLUCOFERRIN®

Nutraceutical GTF Complex for Insulin Resistance and Glucose Metabolism

### Overview

Glucoferrin® dietary and nutritional supplement is a unique nutritional complex, designed to provide GTF-Glucose Tolerance Factor necessary for human body, to optimize Insulin potency and sustain proper Insulin production level. Insulin is a very important hormone produced by the pancreas. Most of the functions of Insulin are directed at the metabolism of carbohydrates, sugar, starches, fats and proteins, the chemical processes that occur within a living organism to maintain life. The liver also needs GTF to manufacture fatty acids, lecithin, and lipoproteins. GTF is a complex composed of trivalent chromium, amino acids-Lactoferrin specific minerals and vitamins. The human body does not produce GTF, it must be obtained and consumed as food regularly on a daily basis. GTF chromium is difficult to absorb, the Glucoferrin™ supplement is a complex designed for maximum strength and absorption as a daily supplement. GTF deficiency is linked to conditions named insulin resistance and metabolic syndrome. Common characteristics of insulin resistance are hyperglycemia when blood sugar is too high, hypoglycemia when the blood sugar is too low, increased body weight and the waistline, high blood pressure, fatigue.

Insulin resistance consists of many metabolic abnormalities and defects causing inability to transport glucose and other nutritional substances into the cellular level.

Impairing of this delivery process for the substances which provide energy and biomolecules necessary for carrying out the various body functions, will disrupt cellular homeostasis in all living organisms, caused by lack of nutrients for proper functioning and growth. Metabolic

abnormalities associated with insulin resistance are increased risks of type 2 diabetes mellitus, inflammatory states causing reduced longevity. Glucoferrin<sup>®</sup> GTF is a long-awaited nutraceutical complex, which will help you to sustain your glucose metabolism at its best, your strength and daily wellbeing. Take 1-2 capsules a day with food and water.
